

Wyoming OS/OW Permit Binder

This document is designed for integration into your RAG (Retrieval-Augmented Generation) system for OpenAI, serving as the authoritative reference for Wyoming oversize/overweight (OS/OW) regulations, permitting, and routing.

1. Authoritative Sources (Live Links)

- [Wyoming DOT OS/OW Permits](#)
- [Wyoming Statutes – Size & Weight](#)
- [Wyoming Online Permit Portal](#)
- [Contact WYDOT Permits Office](#)

2. Core Permit Rules & Restrictions

- Permit Required: For vehicles exceeding legal size/weight limits.
- Legal Limits (without permit): Width 8'6", Height 14', Length 60' (combination), Weight 20,000 lbs single axle / 34,000 lbs tandem.
- Superloads: Generally > 16' wide, > 17' high, > 150' long, or 250,000 lbs require engineering review.
- Travel Restrictions: No travel on major holidays or during severe weather. Restrictions may apply in mountain passes.
- Escort Requirements: Width > 14' requires escorts, Height > 17' requires survey + escort, Extreme loads may require Wyoming Highway Patrol coordination.

3. Permit Workflow

1. Carrier/Driver submits load info (dimensions, axle weights, route).
1. System checks statutory limits, bridge restrictions, clearance points.
1. Permit issued via WYDOT online system, fees vary by size/weight.
1. Routing restrictions applied (mountain passes, winter closures).
1. Permit and required escorts must be carried in cab.

4. RAG Extraction Checklist

- Vehicle Width, Height, Length
- Total Gross Weight
- Axle Count & Weights
- Origin & Destination
- Route including passes/closures
- Dates/Times requested
- Escort Requirement Triggers
- Holiday/weather restrictions

5. Driver & Carrier Notes

- Winter travel often restricted; check WYDOT 511 for closures.

- Lighting/Flagging: Red flags required daytime, amber lights at night.
- Permit Validity: Most single-trip permits valid 5 days.
- Emergency: Call 511 for real-time road/weather updates.
